

# INTRODUCING THE PEARL 75

 **PEARL**  
MOTOR YACHTS

# Pearl Motor Yachts reveals plans for its new flagship The Pearl 75

Currently in production and due to launch in 2011, the Pearl 75 will offer owners luxurious living in expansive surroundings. With multiple layout and styling options, each yacht will be created to meet the owner's specific requirements to ensure the perfect floating haven.

The sleek and innovative design, created by the highly acclaimed studio of Bill Dixon incorporates vast areas of specialist glass that maximise light in to the open plan galley, dinette and lower helm areas while large rectangular bonded glass port lights flood the cabins with sunlight by day and moonlight by night. The effect is dramatic and creates bright open spaces.

Internally, accommodation areas have been carefully designed to maximise space with 4 luxuriously finished guest cabins and a crew cabin for 2, all of which are impeccably finished to the exacting standards Pearl has become renowned for. Attention to detail is everything including the a state-of-the-art entertainment system incorporating discreet LCD screens and an integrated sound system throughout.

Externally, the class-beating flybridge design boasts numerous seating and entertaining areas and comes complete with BBQ, wet bar and ice maker. In addition the expansive foredeck and aftdeck seating areas make alfresco dining and entertaining a must. While a jet-ski/tender garage and hydraulic bathing platform provide perfect access to the azure waters.

The Pearl 75 is powered by twin CAT C18, 1150 HP engines that afford a comfortable cruising speed of 25 knots and a top speed of 30 knots with the option to upgrading to twin MTU 1250 HP's. Unique to this class of yacht, the Pearl 75 also boasts the ZF series 4000 pod drive propulsion system incorporating joystick control technology giving greatly increased maneuverability, affording the owner the option of operating the yacht without crew if preferred. Fuel efficiency is increased by some 20% with speed increases of 15% compared to shaft drive installations, its space-saving design also reduces engine room space, which in turn increases accommodation space.

## NOTES TO THE EDITOR

Pearl Motor Yachts was founded in 1997 and have become respected as manufacturers of a range of luxury motor yachts offering voluminous interiors, combined with opulence and design excellence. Every Pearl motor yacht is designed and built to exceptionally high standards using quality materials and experienced craftsmen. Pearl's fleet consists of the Pearl 50 and Pearl 60 and will be joined by the new flagship Pearl 75 in 2011, all of which lead their class in innovation and quality.

Our latest flagship breaks new ground. Reflecting our owners needs and desires, the Pearl 75 brings together sumptuous space with luxurious styling and outstanding levels of comfort. Add to that the impressive manoeuvrability, a class beating flybridge, a jet ski garage and a hydraulic bathing platform and you have a yacht that will have our competitors reaching for the drawing board.

Vast areas of specialist glass maximise light to the saloon, galley and internal helm areas creating bright, open spaces. Large rectangular bonded glass port lights flood the cabins with sunlight by day, and moonlight by night.
